

Welcome to Classic Craft Dental Laboratory

Classic Craft Dental Lab uses only the finest materials to craft crowns and appliances that invite light in and then gives it back in the way of a smiling patient. Each restoration is created with nature's design principles in mind. These design features include: emergence pro-

file, inter-proximal relationships, smile contour, proper occlusion, translucency and marginal integrity. All of this adds up to a shorter seat time and smiling patients.

By using a TQM (Total Quality Management) approach to our system based craft, we are

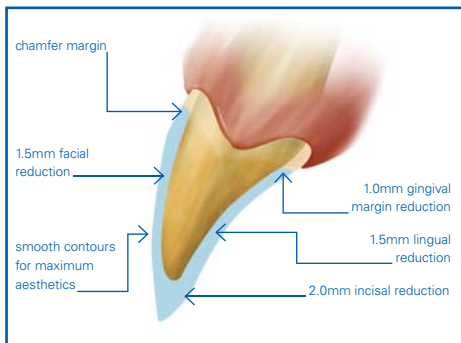

able to deliver predictable fit, finish, functionality and aesthetics. Classic Craft's predictability gives you the comfort in knowing that every appliance you place from us will be a smiling advertisement for your practice.

Product Information [IPS e.max by Ivoclar]

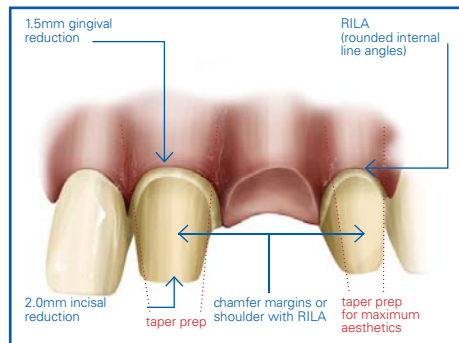

Designed with simplicity and versatility in mind, IPS e.max is the ultimate in both metal-free aesthetics and strength. By using a "cut-back"

technique, we are able to veneer the core with Ivoclar's Ceram porcelain for life like results.

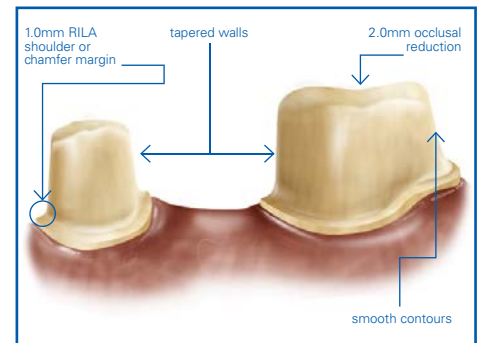

IPS e.max is conventionally cemented.
