

## Welcome to Classic Craft Dental Laboratory

Classic Craft Dental Lab uses only the finest materials to craft crowns and appliances that invite light in and then gives it back in the way of a smiling patient. Each restoration is created with nature's design principles in mind. These design features include: emergence pro-

file, inter-proximal relationships, smile contour, proper occlusion, translucency and marginal integrity. All of this adds up to a shorter seat time and smiling patients.

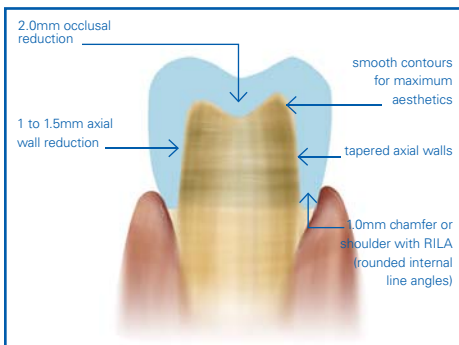

By using a TQM (Total Quality Management) approach to our system based craft, we are

able to deliver predictable fit, finish, functionality and aesthetics. Classic Craft's predictability gives you the comfort in knowing that every appliance you place from us will be a smiling advertisement for your practice.

## Product Information [IPS Empress® by Ivoclar]

Empress revolutionized ceramic crowns more than 15 years ago. Empress crowns are made of an extremely homogeneous leucite based ceramic, which scatters light like natural enamel and blends in well with the adja-

cent dentition. Empress has become the "Gold Standard" for aesthetic restorations and has gained a reputation for producing long-lasting natural results. *Empress is bonded for retention*
