## **SweetTeeth<sup>®</sup> Flexible Partial**

by Classic Craft Dental Laboratory

There is nothing more beautiful than a natural smile. SweetTeeth<sup>®</sup> Flexible Partial gives patients the ability to smile from ear to ear without the fear of showing metal clasps. They are light weight and easily adapt to the surrounding tissue. Formed out of thermoplastic materials, SweetTeeth<sup>®</sup> Flexible Partial has a lifelike translucency that blends with natural tissue. This material also allows us to craft an appliance that is very thin, but incredible strong. So strong, we give SweetTeeth<sup>®</sup> a limited lifetime warranty.

Give your patients the flexibility to choose the right smile for them, give them a SweetTeeth<sup>®</sup> Flexible Partial. Available in three natural shades, SweetTeeth<sup>®</sup> may also be combined with a metal frame on the lingual for increased support.

### **Available Shades**

*Light Pink*

*Pink*

*Dark Meharry*
