

Classic Craft Dental: Putting your health and safety first during the COVID-19 virus.

During these difficult times, we want to assure you that Classic Craft Dental Lab is actively monitoring the COVID-19 virus situation and working to maintain the highest levels of service for our valued customers. Beyond simply monitoring the situation, we have taken and will continue to take and improve measures to minimize the impact of this pandemic on our employees and customers with an emphasis on putting health and safety first. Steps that are being taken include:

- Regularly disinfecting frequently touched areas.
- Encouraging social distancing of 6 feet or more from colleagues whenever practical.
- Encouraging frequent hand washing.
- Encouraging avoidance of large groups and social gatherings and use of digital versus in person meetings.
- Requiring our Technical Representatives to call ahead before visiting an office.
- Scheduling custom shading and other procedures that require a representative to be present for future dates.
- Gloving and masking in the lab when appropriate.
- Distribution of hand sanitizer of 60% or greater alcohol.
- Monitoring the health and well being of our employees.
- Monitoring and following our National, State and Local government protocols, directives and requirements.
- Limiting visitors entering Classic Craft Dental Lab facilities and implementing protocols for visitors.
- Maintaining adequate inventories in order to supply our customers' requirements.

Classic Craft is open and operational. We will continue to keep you informed of any new developments. Thank you again for your business and trust in Classic Craft.

Sincerely,

John Beasley
President
