

PARTIALS

The demand for flexible partials continues to increase as an alternative for fixed restorations or full dentures. Many people consider a Valplast flexible partial to be the most comfortable option for their final restoration. These restorations are more affordable than fixed restorations. Flexible partials move naturally, giving your patient confidence in their smile and ease of movement while talking and eating. Partial dentures can change a patient's way of life. At Classic Craft, we offer hybrid partials, Valplast partials and cast partials.

HYBRID PARTIALS

- Aesthetic clasp
- Metal framework on the lingual for stability
- Teeth can be added
- Available with acrylic saddles

VALPLAST PARTIALS

- Comfortable and light
- Aesthetic - no metal show through
- Longevity - very durable

CAST PARTIALS

- Aesthetic clasp
- Metal framework on the lingual for stability
- Teeth can be added
- Acrylic saddle
