

WHY

Argen Clear Aligners?

- Argen has been a trusted partner to dental labs for more than 50 years, is a leader in digital dentistry, and is committed to delivering high quality products
- Made from a premium thermoformed plastic material that is engineered for precision fit, ongoing force retention, and exceptional durability
- Tear and stain resistant
- 510(k) cleared
- Each clear aligner is marked with a unique identifier code for the case and the stage

TREATMENT OPTIONS

Perfect for Esthetic Cases.

- Anterior and premolar movements like crowding, spacing, midline shift, overbite, and open bite
- No molar movements or band treatment
- Clear retainers available

ADVANCED ENGINEERING

- Premium Material – continual force for faster treatment and greater comfort for your patient
- Improved Stain Resistance – starts clear, stays clear

MODULAR PACKAGING
