

Now more than ever, patients are asking for a clear aligner solution. With these aligners, you can expect:

- Reliable customer service and support for every case, from file upload to aligner delivery
- Average refinement rate of 5% and up to 20% fewer aligner stages results in an ideal treatment plan
- A complete solution from your local lab
- Intuitive software that is easy for experienced and new staff to navigate
- Made in the USA with premium thermoformed materials and FDA-approved

Powered by G&H Orthodontics®

“

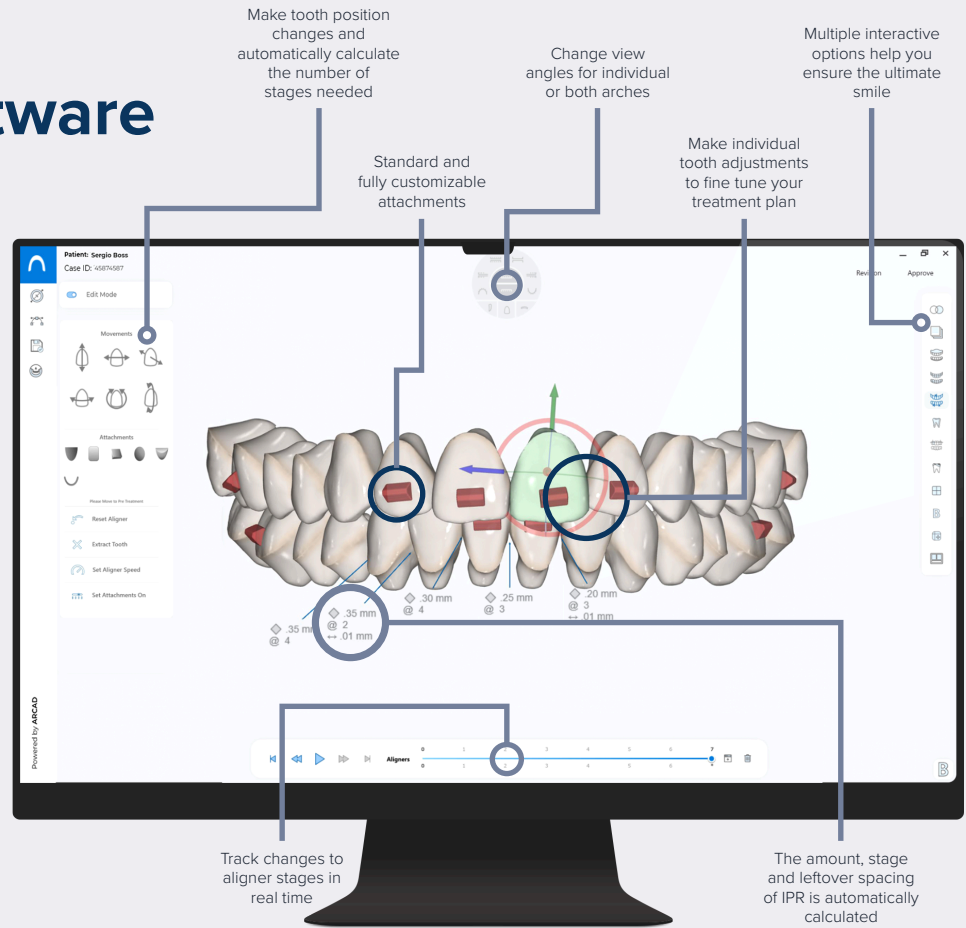

I can truthfully state that the software and aligners compete with the best of them. I've noticed better molar control and torque, more efficient arch expansion, significantly less refinements, faster overall treatment times, and less dependence on attachments.

– Dr. David Lach DDS MS (Lach Orthodontic Specialists)*”

SmileStudio software

We utilize real-time automatic adjustments and comprehensive tooth-movement algorithms to produce ultimate treatment outcomes.

The intuitive user interface keeps control in your hands and offers the flexibility to fully customize every patient's case based on your treatment preferences. Attachments, interproximal reduction (IPR), final archform shape, and tooth movement and rotation speed can all be tailored to fit your standards.

Ready to take your practice to the next level?

STEP 1

Schedule Your Demo

We will walk you through the advantages of the aligner system and how it can easily integrate into your practice. We will highlight the power, flexibility and reliability of the SmileStudio software and its Automated Staging tool.

STEP 2

Submit Your First Case

You maintain complete control of the overall outcome to meet the individual needs of your patients. We will provide an initial case planning recommendation, which can be modified by you prior to being finalized for approval.

STEP 3

Begin Treatment

Give your patients their ultimate smile with fewer treatment stages, lower refinement rates, treatment cost savings and no surprises.
